Our Investment Philosophy

At Advantage Securities, we believe that the path to long-term financial security is paved with unwavering commitment to quality.

Focus on Quality

As Quality investors we follow a rigorous quantitative and entirely rules-based approach to securities selection and portfolio construction.

All equity building blocks that comprise portfolio's are built to prioritise companies with proven track records of financial health, profitability, growth and consistency over time.

Long-Term Approach

Our belief is that Quality investing is a marathon, not a sprint.

Generational wealth is built over time and through unwavering dedication to our core principles, left to compound.

We believe that a portfolio grounded in Quality should stand as a symbol of endurance.

The investment game always involves considering both quality and price, and the trick is to get more quality than you pay for in price. It's just that simple.

Charlie Munger

Investing for the long-term

Deliver a high return on their capital

Strong balance sheets

More efficient use of capital

Exhibit growth and stability in their earnings and dividends

Advantage of higher margin than their peers

Our Philosophy

Investing in quality companies

Brands we invest in

Our approach

It is a marathon, not a sprint

When it comes to securities portfolios, we are patient long-term investors

We aim to construct robust, diversified portfolios that can grow earnings and dividends through different economic cycles

As long as a company meets our quality criteria, we are happy to remain invested

This implies that:

We don't react to market noise (short-term price movements), speculation or opinions

We focus on facts, as gathered from income statements and balance sheets

We don't believe anyone can accurately predict the future, and therefore we don't forecast future earnings and share prices

We do, however, believe that quality companies will outperform non-quality companies over the long-term (10 years +)

Investment Process

Rules-based approach

1

Identify quality companies

Score each company on observable metrics

Rank and select companies in each industry

2

Factor in valuation

Relative to historic valuations

Absolute versus 5-year history

3

Portfolio construction

Construct an optimised portfolio that takes into account both quality and risk

Financial advisers

Financial advisers can trust us to handle every aspect of portfolio management, ensuring alignment with specific mandates and conducting rigorous research into investable securities.

Our solutions are designed to integrate seamlessly with various custody platforms.

We take a high-touch approach to ongoing portfolio management, maintaining regular communication with financial advisers to ensure they are equipped to speak confidently about their portfolios.

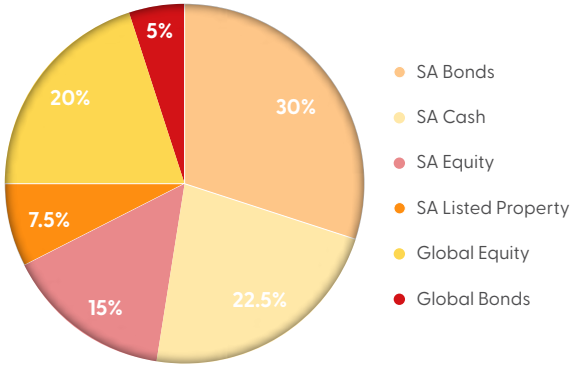
* Performance is net of maximum investment management fees.

Asset allocation



Minimums and fees

Minimum Investment Amount

The minimum investment amount for this share portfolio is R3 000 000 (ZAR).

Fees

A sliding scale of up to 0.5% (excluding VAT) is applicable.

For amounts less than R3 000 000 a different fee applies. Please refer to your portfolio manager.

Risks

Financial markets fluctuate daily and investments in direct equities are linked to the markets. The performance of the investment can therefore not be guaranteed, as markets may go through periods of volatility and are unpredictable by nature. This means that there is a possibility that you may lose capital.

Benefits of the Local Cautious Portfolio

This strategy highlights our stock picking expertise, which utilises a rules-based quant process that aims to outperform through selective excellence rather than sector predictions.

Focus on Quality
We prioritise companies with proven track records of financial health, profitability, growth, and consistency over time.

Long-Term Approach
Quality investing builds generational wealth over time, grounded in our core principles.

Expert Management
Our team of experienced professionals continuously monitor and adjust the portfolio.

Diversified and Balanced
We spread investments across various industries. This balance ensures your investments aren't overly exposed to any single sector's volatility.

Selective and Focused
Our concentrated selection of 20-25 top-performing stocks focuses on quality over quantity.

Risk Management
We aim to optimise your investments for maximum growth while minimizing unnecessary risks.

Peace of Mind
Our curated portfolio offers stability and growth, helping you focus on your long-term financial goals with confidence.

Patience and Consistency
As long as a company meets our quality criteria, we stay invested, ignoring market noise and speculation.

Value for Money
We invest in high-quality stocks that offer value.

Retirement savings

Typical South African Preservation Retirement Fund

1. All South African Retirement Funds must comply with Regulation 28 of the Pension Fund Act:

   Maximum limits: local equity 75%, local property 25%, offshore exposure 45%, and total equity 75%.

2. Top JSE-listed companies typically derive around 50% of their revenue offshore, aligning fund exposure with broader indices.

3. Our Future Builder portfolio achieves 95% offshore economic exposure while remaining Reg 28 compliant.

Benefits of the Global Cautious Portfolio (USD)

This strategy highlights our stock picking expertise, which utilises a rules-based quant process that aims to outperform through selective excellence rather than sector predictions.

- **Focus on Quality**
  We prioritise companies with proven track records of financial health, profitability, growth, and consistency over time.
- **Long-Term Approach**
  Quality investing builds generational wealth over time, grounded in our core principles.
- **Expert Management**
  Our team of experienced professionals continuously monitor and adjust the portfolio.
- **Diversified and Balanced**
  We spread investments across various industries. This balance ensures your investments aren't overly exposed to any single sector's volatility.
- **Selective and Focused**
  Our concentrated selection of 20-25 top-performing stocks focuses on quality over quantity.
- **Risk Management**
  We aim to optimise your investments for maximum growth while minimizing unnecessary risks.
- **Peace of Mind**
  Our curated portfolio offers stability and growth, helping you focus on your long-term financial goals with confidence.
- **Patience and Consistency**
  As long as a company meets our quality criteria, we stay invested, ignoring market noise and speculation.
- **Value for Money**
  We invest in high-quality stocks that offer value.

* Performance is net of maximum investment management fees.

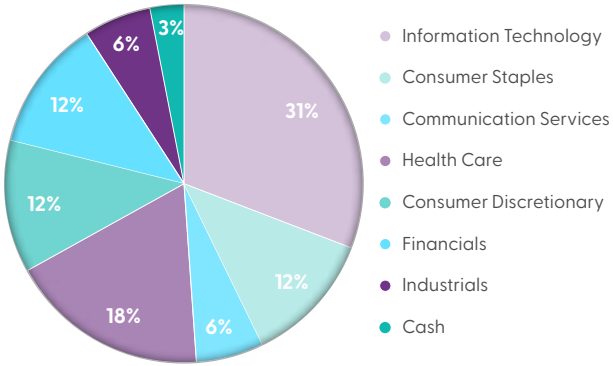
Industry allocation



Minimums and fees

Minimum Investment Amount

The amount in a satellite portfolio would be an amount over and above the minimum investment amount of $150 000 (USD) in a global model portfolio.

Fees

A sliding scale of up to 0.5% (excluding VAT) is applicable.

For amounts less than $150 000 a different fee applies. Please refer to your portfolio manager.

Risks

Financial markets fluctuate daily and investments in direct equities are linked to the markets. The performance of the investment can therefore not be guaranteed, as markets may go through periods of volatility and are unpredictable by nature. This means that there is a possibility that you may lose capital.

Benefits of the Global Growth Driver (USD)

This strategy highlights our stock picking expertise, which utilises a rules-based quant process that aims to outperform through selective excellence rather than sector predictions.

- **Focus on Quality**
  We prioritise companies with proven track records of financial health, profitability, growth, and consistency over time.
- **Long-Term Approach**
  Quality investing builds generational wealth over time, grounded in our core principles.
- **Expert Management**
  Our team of experienced professionals continuously monitor and adjust the portfolio.
- **Diversified and Balanced**
  We spread investments across various industries. This balance ensures your investments aren't overly exposed to any single sector's volatility.
- **Selective and Focused**
  Our concentrated selection of 20-25 top-performing stocks focuses on quality over quantity.
- **Risk Management**
  We aim to optimise your investments for maximum growth while minimizing unnecessary risks.
- **Peace of Mind**
  Our curated portfolio offers stability and growth, helping you focus on your long-term financial goals with confidence.
- **Patience and Consistency**
  As long as a company meets our quality criteria, we stay invested, ignoring market noise and speculation.
- **Value for Money**
  We invest in high-quality stocks that offer value.
